# Legacy report retirement – Summer 2024

Product Update

Mar 15, 2023

## Overview

### Last year of legacy reports

NWEA is committed to delivering a continuous stream of enhancements and innovations that improve the reporting experience and make it easier to transform insights into decisions that drive student learning growth. As a primary part of this commitment, NWEA is accelerating the vision to expand the interconnected and interactive Profile report experience. The Student, Class, School, and District (in the future) Profile reports provide partners with the data they know and trust in a format that speeds up how quickly they can take action and improve learning outcomes. As NWEA delivers more enhancements to the Profile reports, the older legacy reports will become increasingly obsolete. To provide district and school partners with the most up-to-date reporting experience, NWEA will retire most of the older legacy reports in the summer of 2024.

Table 1: Full list of reports with active or retired status, before and after summer 2024.

Report Name	Status before summer 2024	Status after summer 2024	New Replacement Report
Class report	Active	Retired	Class Profile report
Grade report	Active	Retired	School Profile report
Class Breakdown by RIT	Active	Retired	Class Profile report
Class Breakdown by Instructional Area	Active	Retired	Class Profile report
Class Breakdown by Projected Proficiency	Active	Retired	Class Profile report
Student Progress	Active	Retired	Student Profile report
ASG Quadrant report	Active	Retired	Class Profile report
ASG Summary/Projection report	Active	Retired	Class Profile report
District Summary	Active	Retired	District/School Profile report
Student Growth Summary	Active	Retired	District/School Profile report
Projected Proficiency Summary	Active	Retired	District/School Profile report
School Profile report	Active	Active	-
Class Profile report	Active	Active	-
District Profile report (Release date = TBD)	Not available	New by Summer 2024	-
Learning Continuum (Test View)	Active	Active	Learning Continuum
Learning Continuum (Class View)	Active	Retired (Summer 2023)	None
K–2 Screening and Skills Checklist: By Student	Active	Active	-
K–2 Screening and Skills Checklist: By Class	Active	Active	-
Family report	Active	Active	-
Grade Breakdown (.csv)	Active	Retired	District/School Profile report
Comprehensive Data File (.csv)	Active	Active	-
Combined Data File (.csv)	Active	Active	-

## FAQ

### Q: Why is NWEA retiring these legacy reports?

A: NWEA is retiring older legacy reports to focus partners on the new and improved reporting experience available in the Profile reports. The data partners rely on from the legacy reports will be added to each of the new Profile reports and be presented in a way that is easier to use. Retiring legacy reports will also make the underlying NWEA technology more efficient, allowing acceleration in the development of the new Profile reports.

**Q: When will the legacy reports be retired?**

A: Legacy reports will be retired in the summer of 2024. The 2023–2024 school year will be the final year these reports will be available.

**Q: Who will be affected by these changes?**

A: All educators who use MAP Growth reports will be affected. Educators will need to transition to the new Profile reports as their primary sources of MAP Growth data after the summer of 2024.

**Q: Which reports should partners use instead of the legacy reports?**

A: Partners should use the following reports:

- Student Profile report
- Class Profile report
- School Profile report
- District Profile report (release date = TBD)

**Q: Will NWEA Professional Learning change due to the retirement of the legacy reports?**

A: Yes, NWEA Professional Learning courses that focus on MAP Growth reports will undergo a refresh in the summer of 2023 to help partners focus on using the Profile reports. This change provides partners a full school year of training on the Profile reports before the legacy reports are removed from the system. The ultimate goal of this change is to create a smooth transition between the legacy reports and the Profile reports.

**Q: Why is NWEA telling partners about the legacy report retirement so far in advance?**

A: Ensuring that partners are aware of the future of MAP Growth reports is important for training purposes. NWEA wants to make sure that partners are training their staff on how to use the Profile reports between summer 2023 and summer 2024 so that the legacy report retirement in the summer of 2024 is as seamless as possible.

**Q: I really love the ASG Quadrant report. Why are you retiring it?**

A: The ASG Quadrant reporting view is incredibly valued and loved. This specific data view will be built into one of the Profile reports before the legacy report retirement in the summer of 2024.

**Q: The Projected Proficiency Summary report has helpful information. Will the new Profile reporting provide similar information?**

A: The Projected Proficiency Summary report does have helpful information. The data points that partners value and love will be built into one of Profile reports.

**Q: When will the District Profile report be released?**

A: NWEA is working to release the District Profile report by Summer 2024.

**Q: Can I still get a legacy report I love via custom reports?**

A: Once NWEA retires the legacy reports, they will also not be available via custom reports.

**Q: Is there any way to opt out of these changes?**

A: No. There is no way to opt out of the legacy report retirement. The legacy reports are being retired from the MAP System itself in the summer of 2024 which means all partners will be affected.
